

VARIN VAPM-80

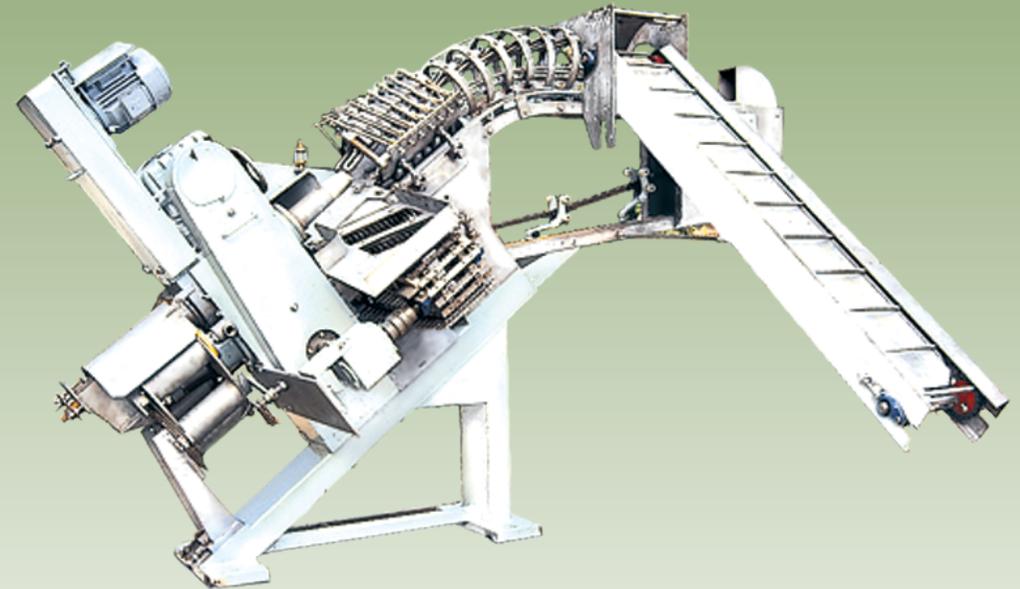

pineapple peeling machine

Operating speed up to 80 fruits per minute. VAPM-80 Pineapple Peeling Machine provides the pineapple industry with an efficient, high speed machine for the production of accurately cored cylinders from a full range of fruit sizes.

Smooth and accurate operation : The VAPM-80 cuts an accurate cylinder from the center of the fruit and removes the ends and core to create a finished cylinder that is ready for transfer to the VARIN model VS-900 Single Knife Pineapple Slicer. It then eradicates the edible meat from the skin in two cuts for crushed and juice pack. It may also be equipped with an optional end eradicator.

Heavy duty construction : The heavy duty, precision components of the turret indexing, coring and driving mechanisms provided product quality. The clean, simply design results in better sanitation, shorter clean up time and reduce maintenance costs

Size changes : The standard VARIN Pineapple Peeling Machine is set up to produce pineapple cylinders of 3-1/2" (94 mm) diameter for No.2-1/2 cans. Change parts are available to produce various cylinder sizes from 2-1/2" (63 mm) to 4 1/2" (114 mm) in diameter..

PRODUCT SPECIFICATIONS

Standard Peeling	Dia 94*, 83, 80, 73, 63** mm
------------------	------------------------------

Standard Coring	Dia 38, 34, 30, 28, 25 mm
-----------------	---------------------------

(SS Seamless Tubing with 1 mm Wall Thickness)

Capacity Per Minute	80 Fruits Per Minute
---------------------	----------------------

Motor Power	3 Hp
-------------	------

Electrical Controls	380V/50 Hz
---------------------	------------

Machine Dimension	W122 x L335 x H213 cm
-------------------	-----------------------

Net Weight	1,800 kg
------------	----------

*Standard for No.2-1/2 can. **Standard smallest operating size.
